

ChatViewWidget::hideReplyUI

```
graph LR; A[ChatViewWidget::hideReplyUI] --> B[ChatViewWidget::clearReplyUI]; A --> C[ChatViewWidget::replyCancelled];
```

The diagram illustrates a branching logic flow. A single source node on the left, labeled 'ChatViewWidget::hideReplyUI', has two outgoing arrows pointing to two separate destination nodes on the right. The top destination node is labeled 'ChatViewWidget::clearReplyUI' and the bottom destination node is labeled 'ChatViewWidget::replyCancelled'.
